Setting out in Problem Solving

Academic year 2026-27: Late Autumn

Course overview

Our Setting Out in Problem Solving course is designed specifically for Year 12 students studying A level Mathematics or Further Mathematics who are eager to enhance their problem-solving skills.

The course will also explore the range of university admissions tests required for some universities to study maths or a related subject.

Features of the course:

- One 90-minute online session with some follow-up materials
- Introduction to the range of university admissions tests
- Explore and answer mock questions from various admissions tests

Session information

The course will be at 17:30 and will be held on Zoom.

Students must apply for this course themselves. Choose the session that best fits your timetable from the table below:

Dates
16 November
26 November

Quotes

"The solutions to the questions were enjoyable because I realised that the questions are not really that hard."

"I've just started Year 12 and was not fully aware of the significance of these admissions tests, so it was very illuminating to see what lies ahead :)"

"I thought it was very helpful, I liked the various sources of support they gave and more generalised tips for problem solving as opposed to exclusively going through specific questions."

Eligibility - Due to funding places on this course are free to students from state-funded schools and colleges in England only. Other students are not accepted on this course.
