Core Maths Teaching Workshop

Hertford

13th March 2019

Overview

An engaging event focused on supporting teachers with the delivery of the increasingly popular Core Maths qualifications as well as contextualised problem solving in other maths courses or courses with mathematical content. This day has been designed to complement our other Core Maths professional development opportunities; all sessions are unique to the day.

Aims

- To provide teachers with an opportunity to explore resources and teaching approaches useful for contextualised problem solving.
- To network with new and experienced teachers of Core Maths and, possibly, other subjects.
- To consider how best to structure and deliver the course in your school for your students.

Who will benefit from attending?

This course is suitable for anyone who is already teaching Core Maths this academic year, for teachers who are interested in finding out more prior to teaching Core Maths or teachers of other Level 3 courses which have mathematical requirements.

Cost

State-funded schools, colleges and academies can apply to this course for **free**.

Schools and colleges located within [Priority Areas](#) are eligible to receive a subsidy of £250 to support staff cover and travel costs. For more information, visit our [subsidies](#) page.
