

Advanced Mathematics
Support Programme®

FREE Mathematical Enrichment for Year 10 students

London

18th July 2019

Overview

We have two excellent talks lined up, contrasting the applications of Mathematics and the beauty of the subject for its own sake:

The Hidden Maths of Technology, [Zoe Griffiths](#)

The Creation of Number, [Ben Sparks](#)

Zoe and Ben are both inspirational so you might like to invite along Year 10 students who are good at maths but who need some convincing to continue with the subject beyond GCSE.

This session will run again in the afternoon, from 1pm until 3.30pm.

This event is free but places must be booked in advance and are limited to ten per school (plus teachers). To book places, please email Jenny stating whether you wish to book in for the morning or afternoon session and how many places you would like.

Admin note: This event is now an amalgamation of both 5986 and 6118. 6118 has been deleted as an individual event, and the feedback has been added under this number.
