

LOPD | AS Maths: Pure Improvers

Online series

2nd March 2022

Overview

Live Online Professional Development (LOPD) courses form a programme of innovative online courses, designed to enable teachers to develop their teaching with confidence in a convenient, stress-free way.

LOPD courses are delivered using a browser-based online classroom that allows participants to collaborate online in real time. The courses aim both to cover subject content common to all current specifications and to facilitate the exchange of teaching ideas. Rather than attending a one or two day course away from school or college, participants will use the internet to meet weekly online.

This course comprises 5 online sessions with an experienced tutor, each between 60 and 90 minutes in length and delivered in a small group of teachers allowing opportunities for interaction and discussion.

Aims

- To provide teachers who are already familiar with AS level pure maths with an opportunity to look at pedagogical approaches and engaging activities.
- To consider the use of technology in embedding key ideas and the style of recent examination questions.
- To provide opportunities to interact with the course tutors and other delegates in a small group to discuss subject content, resources and teaching ideas.

Who will benefit from attending?

Teachers who have previously taught the AS pure element of the A level Mathematics course or those seeking wider pedagogical approaches and resources.

It is **not** intended for those teachers wishing to re-learn mathematical techniques who would be advised to consider the [AS Maths: Pure Absolute Beginners](#) course instead.

Content

- Functions
- Differentiation
- Integration
- Trigonometry
- Logs & Exponentials

Materials and Equipment

You will need access to a good internet connection, using Chrome or Firefox as a browser. You will need a headset with a microphone to engage with the live sessions and most courses also require a means of sharing handwritten maths, such as a mini-whiteboard and webcam, a visualiser or a graphics tablet. Full details of how to set these up can be found on our [online classroom support page](#). Access to GeoGebra and/or Desmos will be useful.

Other Information

The order of topics may be subject to change.

Eligibility

All teachers are eligible for this course, however free places are available only to teachers in state-funded schools, colleges and academies in England. Applications for free places will be checked to verify eligibility.

Teachers must ensure that they are able to attend the live sessions before applying for a place as our courses are subject to very high demand: please do not apply for a place if you will not be able to attend at least 75% of sessions. Further instances of our courses will be added to meet demand; if you are not able to attend 75% of the sessions in this course, you might like to consider completing our [register of interest form](#) (this is NOT an application form) and letting us know when would be better for you.

Cost

This course is free of charge to teachers working in state-funded schools, colleges and academies in England, otherwise the fee is £95.

Study Schedule

Date	Session content
Wed 02 Mar	Functions
Wed 09 Mar	Differentiation
Wed 16 Mar	Integration
Wed 23 Mar	Trigonometry
Wed 30 Mar	Exponentials and logarithms

Key Facts

Event ref:	#9249
Audience:	Teachers
Curriculum focus:	A level Mathematics
Mathematical focus:	Pure
Event format:	Live Online Professional Development
Online sessions:	5
Region:	National
Start date:	Wed 2nd Mar 2022
Course times:	16:30 - 18:00
Fee:	Free for state-funded schools; £95 otherwise

Registration

For more information, or to register for this event, please visit <https://amsp.org.uk/events/details/9249>
