

Planning with intent

Online

8th March 2022

Overview

'We teach students maths that helps them do stuff'. - Charlie Stripp

We will be looking at what it means to **plan with intent** when planning to teach a topic, a lesson, or even the whole curriculum by considering how to start, why, what to move onto next and what do we do with our disadvantaged students. We will also look at developing a script of our intentions robustly to withstand scrutiny.

We will look at developing a plan by considering the maths that is needed to be able to solve a particular problem.

There will be a chance to share expertise and experience.

Aims

- To develop understanding of how to plan a curriculum with intent

Who will benefit from attending?

Maths teachers with an interest in developing their curriculum planning.

Materials and Equipment

This meeting will be held on Zoom. An invitation will be sent to you within 24 hours of event start. Please do not share this link with anyone else.

You are advised to use a headset or headphones with an inline microphone to provide the best sound quality and to prevent audio issues for other users. A laptop with a built-in webcam and microphone may be sufficient if you're in a quiet area but please take the time to check this before the session.

Discussion will be both via audio and the chat box. Please join with a microphone if possible. Joining with your camera on would be most welcome but, of course, not compulsory.

As part of our safeguarding procedures please note the following: (i) It is important that you log in with the names you used when you registered for the course otherwise you may not be allowed into the room. (ii) You must not pass on any of the registration or Zoom meeting details to anyone else.

Key Facts

Event ref:	#9377
